

Sistelnetworks showcases vWand NFC stylus innovations at NFC world congress in Nice.

- ✓ *vWand new use cases for hospitals and new apps for identification, reading and writing of tags to be shown at booth #40.*
- ✓ *SDK versions available for Android experts and NFC programmers. Also apps available at Google Play.*

Nice, France – July 20th, 2013 – Sistelnetworks, an NFC market leader and award-winning technology innovator, announced today that it will be showcasing a wide array of use cases to add NFC capabilities to any tablet and smart phone using vWand. Sistelnetworks will be showing a variety of vWand applications designed to meet the varying needs of hospitals, industries and commerce at NFC world congress. The event will take place at the Côte d’Azur in a new and larger venue in the center of Nice: the Acropolis Convention Centre., from September 24th to 26th (<http://www.nfcworldcongress.com/>)

NFC World Congress shares a common 1350 sqm exhibition space with the other World Smart Week events: M2M Innovation World Congress, World e-ID Congress and Chip-to-Cloud Security Forum. Running along four complementary conferences, the World Smart Week exhibition maximizes synergies in term of contents, networking and audience:

- 1700 participants coming from the complementary and converging markets of mobile/contactless, M2M, digital identity and digital security
- 50 booths displaying new products, innovative solutions and expertise: Exhibitors list
- 100 demos scheduled throughout 2.5 days

Also integrators and solution providers will be able to order Evaluation Kits including vWand, NFC tags and SDK, to create their own solutions. vWand allows any tablet or smartphone to add NFC capabilities easily, using the available Bluetooth connection.

“vWand is going to cover scenarios where NFC technology is required. Functionalities like safe identification, reading and writing of tag information could be fully integrated with any solution via SDK. We welcome developers and integrators to explore all the possibilities of NFC technology in the market,” commented Jose Luis Vilar, CEO of Sistelnetworks.

Adds NFC to your tablet or smartphone

vWAND

nfc)) Bluetooth®

The image is a promotional graphic for the vWAND device. On the left is a vertical, light blue and silver device with a speaker grille at the top, a power button, a volume rocker, and a 'CHG' indicator. The 'sistelnetworks' logo is printed vertically on the device. To the right, the text 'Adds NFC to your tablet or smartphone' is displayed in bold. Below this text are two inset images: the top one shows a hand holding a white smartphone, and the bottom one shows a hand using the vWAND device to interact with a tablet displaying a data chart. At the bottom of the graphic are the 'nfc))' logo and the 'Bluetooth®' logo.
